Professional Summary

Computer Science undergraduate (CGPA: 9.13/10) building AI-powered applications, automation workflows, and full-stack software systems. Experienced in developing machine learning pipelines, computer vision systems, backend applications, and data-driven platforms. Strong foundation in software engineering, artificial intelligence, data structures, algorithms, and creating end-to-end solutions for real-world problems.

Technical Skills

Languages:	Python, Java, C++, JavaScript, TypeScript, SQL
AI/ML:	PyTorch, Transformers, NLP, Computer Vision, Reinforcement Learning, Gemini API
Data & Automation:	Pandas, NumPy, Data Processing Pipelines, Async Programming, Workflow Automation
Backend:	Node.js, Express.js, Flask, REST APIs, Authentication, API Integration
Frontend:	React.js, Flutter, Tailwind CSS, HTML, CSS
Databases:	SQLite, MySQL, Firebase Firestore
Engineering:	Data Structures, Algorithms, OOP, DBMS, Git, GitHub, VS Code, Jupyter Notebook

Selected Projects

AI Insight Pipeline

Nov 2025

Python · PyTorch · Transformers · Gemini API

- Built an AI analytics workflow automating dataset profiling, feature analysis, sentiment detection, and insight generation.
- Integrated Transformer models and Gemini API workflows for automated report generation from structured datasets.

Global Manga Library Manager

Jul 2026

Python · AsyncIO · Playwright · SQLite

- Designed an offline-first data platform that aggregates and synchronizes bookmarks, reading history, metadata, and content from multiple sources.
- Built automated ingestion pipelines using asynchronous workers, retry handling, caching, and version-controlled processing for incremental updates.

Clinic Management System

Dec 2025

React · Node.js · Express.js · SQLite

- Built a full-stack healthcare platform managing patient records, appointments, prescriptions, billing, and workflows.
- Developed REST APIs and database workflows using Node.js, Express.js, and SQLite.

Advanced ISP Pipeline

Mar 2026

Python · OpenCV · NumPy · Computer Vision

- Developed a computer vision pipeline reconstructing RGB images from RAW Bayer sensor data.
- Implemented demosaicing, white balance, color correction, gamma rendering, and noise reduction using OpenCV and NumPy.

GO UP 2.0 AI (Reinforcement Learning Agent)

Nov 2024

Python · PyTorch · Reinforcement Learning · Q-Learning

- Built a reinforcement learning agent using Q-learning and reward optimization for a custom game environment.
- Engineered state representation and exploration strategies, achieving **44 consecutive blocks** without hard-coded logic.

Education

B.Tech in Computer Science & Engineering (Artificial Intelligence)

2023 – 2027

Bennett University

CGPA: 9.13/10

CBSE Class XII: 87% — CBSE Class X: 92%
